

**Amendments to the Claims:**

The listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A device for cleaning an installation for the production or processing of foodstuffs or pharmaceuticals, said device comprising:

at least one cleaning unit configured to move within the installation to be cleaned and adapted to clean essentially the whole inside surface of the installation wherein the production or processing of foodstuffs or pharmaceuticals takes place, said cleaning unit including a conveyance system and at least one nozzle configured to output a cleaning agent and at least one nozzle tip configured to output a cleaning agent wherein said nozzle tip is configured to be actuated in a rotational movement by a flow of cleaning agent ;

a parked position for the cleaning unit in the interior of the installation, said parked position comprising a plate installed under said cleaning unit to prevent cleaning agent from dripping and said parked position being configured so that the cleaning unit may be parked thereupon during a production or processing of foodstuffs or pharmaceuticals; and

a flexible connection configured to supply a cleaning agent to the cleaning unit and to move with a movement of the cleaning unit.

2-5. (Cancelled)

6. (Previously Presented) The device of claim 1, wherein the conveyance system is configured as a carriage.

7. (Previously Presented) The device of claim 1, further comprising a guide system for guiding the conveyance system.

8. (Original) The device of claim 7, wherein the guide system comprises at least one guide rail.

9. (Previously Presented) The device of claim 1, wherein said parked position is to prevent contamination of the foodstuffs or pharmaceuticals with cleaning agent.

10. (Original) The device of claim 1, further comprising a driving gear for moving the cleaning unit, said driving gear being connected to the cleaning unit with a power transmission element.

11. (Original) The device of claim 10, wherein said driving gear is positioned outside of the installation to be cleaned.

12. (Original) The device of claim 10, wherein said power transmission element comprises a chain.

13. (Original) The device of claim 12, wherein said chain is a non-lubricated steel chain.

14. (Original) The device of claim 1, wherein said flexible connection is a tube.

15. (Original) The device of claim 14, wherein said tube is constructed from plastic.

16. (Original) The device of claim 1, wherein said flexible connection connects the cleaning unit to a source for the cleaning agent.

17. (Original) The device of claim 1, further comprising a mechanism for changing the length of the flexible connection so as to adapt the flexible connection to the movement of the cleaning unit.

18. (Original) The device of claim 17, wherein said mechanism for changing the length of the flexible connection comprises a roller which is connected to a driving gear.

19. (Original) The device of claim 18, wherein the roller is axially moveable.

20. (Original) The device of claim 18, wherein the roller is configured to move in response to a force provided in an axial direction.

21. (Original) The device of claim 18, further comprising a first bearing arrangement for the roller and a second bearing arrangement for the roller.

22. (Original) The device of claim 21, wherein said first bearing arrangement is configured as a screw thread.

23. (Original) The device of claim 21, wherein said first bearing arrangement is configured as a trapezoidal thread.

24. (Original) The device of claim 21, wherein said first bearing arrangement is configured as a multiplex trapezoidal thread.

25. (Original) The device of claim 18, further comprising a shaft for the roller wherein said shaft is configured to conduct a cleaning agent.

26. (Original) The device of claim 18, wherein a single driving gear is provided for driving the roller and for moving the cleaning unit.

Claims 27 – 29. (Cancelled)

30. (Previously Presented) An installation for the production or processing of foodstuffs or pharmaceuticals comprising:

an interior space;  
a conveyor belt for transporting foodstuffs or pharmaceuticals  
within the interior space; and  
the device for cleaning an installation for the production or  
processing of foodstuffs or pharmaceuticals of claim 1 said device for cleaning an  
installation for the production or processing of foodstuffs or pharmaceuticals of  
claim 1 being within the interior space.

31. (Previously Presented) The installation of claim 30, wherein said  
installation is a system for freezing foodstuffs and further comprises:

an entry system for a refrigerating agent.
